

**The Utah Department of Agriculture in conjunction with the
Colorado-State Animal Response Team and the Colorado Veterinary
Medical Foundation
Are offering a
Bio-Defense/Emergency Response
2 day Seminar**

The goal of the seminar is to inform veterinary practitioners and other interested groups on efforts in emergency response roles that they can assume in case of significant emergencies of various types. Much of this information can translate directly into your daily practice in addition to you being a local resource in case of disaster, disease or emergency.

There is NO COST for attending, but you do need to register by contacting Warren Hess at wjhess@utah.gov or 801-538-4910 (office) or 801-870-7818 (cell).

16 Hours of Continuing Education Credit has been applied for.

Location : Utah Department of Agriculture and Food
 2nd Floor Conference Room
 350 N. Redwood Road
 SLC, Utah 84114

Dates: Wednesday, January 31 and Thursday, February 1

A limited number of rooms are being held at the State Government rate of \$68 per night at **Comfort Suite Hotel** which is close by (171 N. 2100 W.). Their number is 801-715-8688 and let them know that you are attending the UDAF Bio-Defense/Emergency Response meeting. They have a complete breakfast (not continental) included.

Lunch will be provided both days of the seminar.

There is some literature that would be helpful to look over prior to attending the meeting to help you understand some of the structure and language used by federal, state and local governments in emergency situations. This material will be supplied to you once you register.

Below is an agenda of the meeting

**Biodefense Training Program
Salt Lake City, Utah
January 31st – February 1st 2007**
